Irish Electricity

In the past two years Minerex Environmental Ltd. have been engaged on numerous occasions by ESB Tarbert as groundwater consultants. The work which was carried out at Tarbert involved intrusive investigation and groundwater sampling.

I was extremely happy with the both the quality of work and the expert advice which were provided by Minerex. The staff are highly efficient and very professional. Any projects in which Minerex were involved were completed on time and to the complete satisfaction of ESB.

Regards,
