RE: Minerex Environmental Limited

To Whom It May Concern,

Minerex Environmental Limited were appointed by O'Callaghan Moran & Associates (OCM) to undertake a soil boring programme in Counties Tipperary, Carlow, Wexford and Waterford as part of the South Eastern River Basin District groundwater characterisation programme being undertaken by OCM.

The works undertaken by Minerex included the installation of soil borings to 3 - 4 m depth, logging of subsoils using BS.5930 and provision of soil boring logs to OCM.

The work undertaken by Minerex was carried out efficiently and within the timeframe agreed with OCM. Minerex were capable of improvising in response to changing conditions during the project without compromising timeframes or deliverables. OCM would recommend their services in similar projects elsewhere without hesitation.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Sean Moran', with a horizontal line extending to the right.

Sean Moran
